Discord: asoreyh#9106

Current Positions

Researcher (TNG 312 - Principal B) at the Medical Physics Department, Gerencia de Física (GF), and at Instituto de Tecnologías en Detección y Astropartículas (ITeDA), Gerencia de Área de Investigaciones y Aplicaciones No Nucleares (GAIYANN), Comisión Nacional de Energía Atómica (CNEA).

Associated Professor at Sede Andina, Universidad Nacional de Río Negro (UNRN, interinate).

Education

2012

DOCTOR IN PHYSICS (PH.D.)

Institution: Particles and Fields Group, Centro Atómico Bariloche - Instituto Balseiro, CNEA-UNC.

Thesis: The Water Cherenkov Detectors of the Pierre Auger Observatory and their Application to the Study of Background Radiation. *Advisor:* Dr. Ingomar Allekotte. MASTER IN SCIENCE, PHYSICS

2005

Orientation: High Energy Physics. *Institution:* Particles and Fields Group, Instituto Balseiro, Centro Atómico Bariloche (CNEA-UNC). *Thesis:* Event Reconstruction with the Surface Detectors of the Pierre Auger Observatory. *Advisor:* Dr. Ingomar Allekotte

2004

“LICENCIADO” IN PHYSICS

Institution: Instituto Balseiro, Centro Atómico Bariloche (CNEA-UNC)

Research & Teaching Activities

Since I have earned my master degree in December 2005, I have been involved in the following projects:

MEDICAL PHYSICS DEPARTMENT, CAB,(2016-PRESENT)

Project manager of the PlomBOX project, an open device to measure lead in water

Astroparticle detection applications (I): development of simulations and detectors for the calculation and measurement of spatial dose distribution in clinical and high-level dose environments.

Development of new artificial-intelligence-based big data analysis, big data curation and big data anonymization.

Head of the Medical Physics Department (GF-GAIYANN-CNEA). Elected by the members of the Department (2017-2021).

ITeDA, CAC,(2018-PRESENT)

Astroparticle detection applications (II): muography of big artificial and geological buildings: applications to volcanic risk assesment, mining prospecting and dams densitometry

Astroparticle simulations applications: application in muography, space weather and new radiation detectors and shielding designs.

LATIN AMERICAN GIANT OBSERVATORY (LAGO) (2007-PRESENT)

See lagoproject.net

Responsible of the LAGO Thematic Service at the Horizon 2020 EOSC-Synergy project.

Principal Investigator, 2013-2016

Design and execution of the project new organization

Design and coordination of the LAGO Space Weather program

Simulations and data analysis for the detection of transient events (GRB and Forbush events), background radiation and atmospheric physics.

Research, development and building of water-Cherenkov detectors for the LAGO project at Universidad Industrial de Santander and Centro Atómico Bariloche. One of them is currently installed and is operating at the Antarctic Peninsula.

Design and coordination of the experiment “Measurement of Muon Lifetime in Water”, done by undergraduate students at Instituto Balseiro.

ANDES UNDERGROUND LABORATORY (2010-2013, 2015-2016, 2018-PRESENT)

See www.andeslab.org

Estimation and measurements of the expected backgrounds at the ANDES underground lab due to natural radioactivity and high energy atmospheric muons.

Laboratory design.

Muon veto for the ANDES experiments design

TEACHING (2009-PRESENT)

2015-present Associated Professor, Thermodynamics, Cosmology and Astrophysics, Modern Physics A and Wave Physics, Profesorado de Física, Sede Andina, Universidad Nacional de Río Negro (UNRN)

2017-2021 Associated Professor, Astroparticle physics, Particle detection techniques, Double Doctorate in Astrophysics program, Universidad Nacional de San Martín (UNSAM)

2016-2020 Member of the Academic Committee of the Master in Medical Physics program of the Instituto Balseiro, Universidad Nacional de Cuyo.

2014-2015 Professor, Classical Mechanics (Graduate) and General Astronomy, School of Physics, UIS.

2013-2014 Professor, Introductory Physics course and Introductory Particle Physics course, UIS.

2014 Design and lecture of the course “Astro-meteorology and Climate Change”, intended for High Schools teachers, UIS, March 2014.

2013 Professor, Advanced Mathematical Methods for Physics course, UIS.

2009-2012 Senior teaching assistant, Physics I (introductory physics) course, UNRN.

2010-2012 Teaching assistant, Experimental Physics III and Introduction to nuclear and particle physics courses, Instituto Balseiro (UNC)

Books, chapters and patents

- 2020 3. H. Asorey, C. Graziosi, A. López Dávalos, [Física IA. De las galaxias a los quarks](#), Colección Lecturas de Cátedra, Editorial UNRN, 334 pg, Viedma, Argentina, ISBN 978-987-4960-29-0, 2020
- 2020 2. H. Asorey, I. Sidelnik, J.J. Blostein, M. Gómez Berisso, J. Lipovetzky, M. Sofo Haro; M. Pérez; L.H. Arnaldi; F. Alcalde, PCT/IB2020/050869: "Usage of Water Cherenkov Detectors for the detection of Neutrons and Gamma Radiation"
- 2019 1. H. Asorey, I. Sidelnik, J.J. Blostein, M. Gómez Berisso, J. Lipovetzky, M. Sofo Haro; M. Pérez; L.H. Arnaldi; F. Alcalde, AR20190100279: "DETECTOR DE NEUTRONES Y RADIACIÓN GAMMA MEDIANTE EL EMPLEO DE UN DETECTOR CHERENKOV EN AGUA"

Human Resources Training Summary

At present, I have trained a total of 16 students, 3 PhD students, 4 MSc students and 7 undergraduated students.

Publication summary

127 peer review journal publications.

86 participations and presentations at Schools & Conferences.

25 technical reports of Comisión Nacional de Energía Atómica and internal technical notes of the Pierre Auger Observatory.
